

Sulzer fixit-kit

The Sulzer fixit-kit and Sulzer parts boxes are the answer to managing risk. Sulzer as a leading provider of OEM quality parts for pumps offers Sulzer fixit-kit and Sulzer parts boxes as your spare parts solution for all pump ranges. It contains a complete set of parts to repair critical equipment and return it back to service in the shortest amount of time.

- Maximize plant uptime and preserve revenue ✓
- Decrease downtime and minimize costs

“Isn’t it about time you called Sulzer for your parts box solution?”

For further information contact us at: partsbox@sulzer.com

Increased plant/unit availability:

- OEM design and quality for optimal performance
- Greater interchangeability
- Immediate pump overhaul

Reduce inventory costs:

- Flexibility to use only those components needed
- Easily identify and replenish components
- Critical items are safe, secure and stored locally

Reduce maintenance costs:

- Organized, contained and controlled set of parts for specific pump and/or set of pumps
- Reduce repair cycle time
- Reduce expediting fees

Sulzer fixit-kits are a further development of the Sulzer parts box solution. These are portable versions of our full size Sulzer parts box that organize and save you time and effort, designed and specially configured to house and protect your investment. Our kits have everything you need to service pump mechanical seals and bearings in the field. In a word, “portability”, defines our Sulzer fixit-kits. Take them where you need them with all the same quality and features of its big brother.

Features

- Combination of any bearing, seal or coupling
- Serialized – All kits get labelled with appropriate part number, pump size, model and serial numbers
- Managable – Each kit is light enough for one person to handle
- Easy rolling – Stainless steel bearings
- Protected – Tough heavy duty polymer shell with each compartment filled with “bagged and tagged” part
- Watertight – Tongue and groove fit with a polymer O-ring acting as a waterproof seal
- Reinforced padlock protectors – Stainless steel reinforced padlock protectors
- Double-throw latches – Prevent unexpected loss of contents

Industries for parts boxes and fixit-kits

We have a deep understanding of the needs of specific industries and long experience with specific applications. This is the basis for our strong offer of efficient and reliable products and fast and economical services for a broad range of industries.

Oil and gas

- FPSO - Floating Production Storage and Offloading
- Oil production
- Petro chemical
- Refining
- Pipeline
- Gas processing
- LNG - Liquefied Natural Gas

Chemical process industry

- Biochemical
- Biofuels

Power generation

- Coal fired generation
- Gas fired generation
- Nuclear generation
- Industrial power generation
